

SMSKenya API Documentation

Base URL: <https://api.smskenya.biz> | Protocol: **POST** Only (HTTPS)

Welcome to the SMSKenya API integration guide. All endpoints require an HTTP **POST** request with form-encoded or JSON parameters, secured via your unique authentication token.

1. Send SMS OTP

Endpoint: /index.php | **Method:** POST

Sends a numeric verification code to a recipient mobile number.

Parameter	Type	Requirement	Description
token	String	Required	Your secure API authentication token.
phone	String	Required	Recipient phone (e.g., 0712345678 or 254712345678).
msg	Numeric	Required	Numeric OTP code to send.

```
<?php
$url = "https://api.smskenya.biz/index.php";
$data = [
    "token" => "your_token_here",
    "phone" => "0712345678",
    "msg"    => "123456"
];

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_POST, true);
curl_setopt($ch, CURLOPT_POSTFIELDS, http_build_query($data));
$response = curl_exec($ch);
curl_close($ch);

echo $response;
?>
```

2. Check Account Balance

Endpoint: /balance/index.php | **Method:** POST

Retrieves remaining SMS credit balance assigned to your token.

Parameter	Type	Requirement	Description
token	String	Required	Your secure API authentication token.

```
<?php
$url = "https://api.smskenya.biz/balance/index.php";
$data = [
    'token' => 'your_token_here'
];

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_POST, true);
curl_setopt($ch, CURLOPT_POSTFIELDS, http_build_query($data));
$response = curl_exec($ch);
curl_close($ch);

echo $response;
?>
```

3. Check Delivery Status

Endpoint: /delivery/index.php | **Method:** POST

Queries the delivery report of a sent message using its unique message ID.

Parameter	Type	Requirement	Description
token	String	Required	Your secure API authentication token.
messageID	String	Required	Unique ID returned when sending the SMS.

```
<?php
$url = "https://api.smskenya.biz/delivery/index.php";
$data = [
    'token'      => 'your_token_here',
    'messageID' => '776082183'
];

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_POST, true);
curl_setopt($ch, CURLOPT_POSTFIELDS, http_build_query($data));
$response = curl_exec($ch);
curl_close($ch);

echo $response;
?>
```
